Article 5. The more than two shares in addition demonstration in this market made last week when David Dows' house bought about 5,000,000 bushels for May for the purpose of diverting the attention of corn shippers. The owners of corn were all hurrying it forward to New York to fill Dows up, and so he coverily made a divertisement at Chicago. He bought about 5,000,000 bushels, and advanced the price of May about le a bushel. This was a very small matter so far as the price went, but if the talk of the Chicago deal has induced Ohio, Indiana, Missouri and Illinois shippers to ship to Chicago rather than to Gotham, it will be a very convote as the froxy of any other stockholder of stockholders, more than two shares in addition to his own proper.

They shall be elected by the board of directors at a meeting upon the first Tuesday in March of each year, and shall held their offices for the period of one year, and until their successors are elected and qualified.

Undoubtedly the millionaire New Yorker knows what he is about in coru. He ought to, for his house moves more than any other haif dozen houses in the world. It will probably turn up that, while there is a vast store of corn in existence, that there is really no No. 2 corn to amount to anything, and, if this does turn out, what is to become of the people who have sold on the strength of a very large crop an unlimited amount of No. 2 for February, March. April and May delivery? Corn ought to grade new, if it is going to, but on Saturday, out of 20 cars, only nine graded, and out of the association.

Article 8. The existence of this corporation 210 cars the day before only five graded. Article 8. The existence of this corporation shall be in on the first Tuesday in March, 1880, and shall continue until the first Tuesday in March, 1880, unless sconer retermined by a dissolution by process of law or a voluntary dissolution by a two-thirds first vote of the stock-holders and a division of the assets of the corporation among the stockholders after full payment and extinction of all indebtedness incurred by the corporation. This is about two and a half to three cars out of each 100 received, less on the average than one 5,000 bushel lot of "regular" out of each day's receipts. Short sellers here and elsewhere affect indifference as to the designs of Dows, but it isn't easy to see why the shorts feel so confident. There can be no better time for a squeeze than when certain that the indifferent quality of corn leads traders to sell No. 2, of which there is very little. ### CHICAGO LIVE STOCK.

CHICAGO, Feb. 22,-[Special Telegram.]-CATTLE-The receipts to-day were much larger than on last Monday, the liberal run doubtless being caused by the advance during the closing days cof last week. The quality of cattle offered was mainly medium. The market was slow to open. Liverpool was 14c higher, and New York reported a stronger market, with light supplies. The markets in the west, of course, were lower. After hearing how dull trade was at this point buyers were holding back, and early bids were 15@25c lower. # CHICAGO GRAIN MARKET.

(From Yesterday's Edition.) Спісаво. Feb. 20.—[Special Telegram.]— Wheat—Wheat was more active to.day advancing leover yesterday's close on news of export purchases. Half of this advance was had in the first ten minutes, the crowd leaving what was thrown yesterday afternoon to only a few private will houses-that there had been fourteen loads taken in New York on Friday. The other half cent advance came along later in the session on reports of purchases to-day of about as much more. So now we know just about the measure of value of exports. It is a simple problem in mental arithmetic. You can hear the wheat school boy muraning it over; "If thirty-two loads bought for export put up the market eight-eighths of I cent, how many loads will it take to put up one-eighth of I cent?" Four loads? Yes, you have guessed it right. Now we may know what to expect the next time there is some buying of this kind. There was no other feature in the market, unless the presence of a good many contradictory telegrams about the growing crop could be called a "feature." Some of them said that the was all dead, and some of them said it never looked better. Such dispatches don't have much effect now, Even a broker
